Gifted and Talented Checklist for Parents

Early childhood

About the checklist:

The checklist is designed to support parents in making some structured observations about their child to provide a general indication about the possibility of giftedness.

Some of the observations on the checklist require comparison with children of a similar age. If your experience with young children is limited, it can be helpful to consult with people who have some expertise or experience in early childhood development e.g. an early learning educator, child carer or family/friends with young children of their own.

Use the checklist to reflect on your child's development and the behaviours they currently show. If you agree that your child shows many of the characteristics, you may consider having them formally assessed for intellectual giftedness by a psychologist.

Help with reading and completing the checklist

If you would like help to read, understand and complete this form, please contact your school principal who will assist or direct you to support services available.

Other sources of information and support:

A good overview of characteristics that may indicate giftedness in pre-school children is also available from The Tasmanian Association for the Gifted Inc. (TAG) website at <http://www.tasgifted.com/> in their flier entitled "*Is your pre-schooler gifted?*"

If you think your child may be gifted it is a good idea to make contact with your local TAG group for further information, resources and support.

Instructions for using the checklist:

The following is a checklist of characteristics of gifted young children. The examples after each item are there to help you to understand that item. **A child may not show all of the examples given and they may exhibit the item characteristic in ways not listed.**

Indicate how much you think your child is like the item by using the scale below each item. Mark strongly agree (SA) to strongly disagree (SD), or DK if you don't know.

Use the space below the item for examples concerning your child, add as many details as you can remember. Be as specific as possible in describing your child's interests and accomplishments. The space is small, so please feel free to add extra pages of stories or examples to tell us more.

16. Thank you for your responses. Please use the rest of this page or attach another page to tell us anything you think is important about your child that we have not asked about. Please feel free to add any information you think might be useful in giving us a clear picture of what your child has done. Be as specific as possible in describing your child's interests and accomplishments. If you can share some copies of your child's creative work, we would be delighted to have them.

**Social and emotional readiness checklist for Kindergarten
- for young children who are gifted**

Early childhood education and child care settings provide adaptive and responsive programs that emphasise personalised learning for each child, using *Belonging, Being & Becoming – The Early Years Learning Framework for Australia*. Kindergartens use this framework to extend and enrich children’s learning through the transition to school. More information about what to expect in Kindergarten is available from the Department of Education publication *Starting Kindergarten*.

When considering children for earlier than usual entrance to kindergarten because of intellectual giftedness, there are some developmental and maturity factors that may impact on their social and emotional readiness to successfully engage with the kindergarten environment.

The list over the page highlights some key indicators of social and emotional development that help children to maximise the opportunities available to them in a kindergarten classroom.

Instructions for completing the checklist on the next page:

Work with an early childhood educator or child carer who knows how your child functions in a group situation to complete the rating for each item on the list over the page.
